

# PRODUCT SEARCH

Our new website features a new and improved search that will make it a lot easier for you to find what you are looking for.

You can utilise our keyword search that has been significantly improved from our old website. Input your search term and make your search. Over time, the results will become more and more informed based on others search terms. You can also now search by the **brand/manufacturer product code**, not just SSS Australia product code.

If you prefer to filter down through categories, you can utilise our product mega menu to see all of our different product groups, and find what you are looking for within your category of choice.

If you are looking for something by a certain brand, you can now do so by picking your brand of choice within the product mega menu.

Once you have completed your keyword search, or you've chosen your subcategory or brand through the product menu, you will be presented with your results. From there, you now have more controls over refining the results even further.

Refine by brand. You can refine down your search results to only show relevant search results by that brand.

The screenshot displays a product search interface. On the left is a sidebar with three main sections: 'RELEVANCE' (set to 'RELEVANCE'), 'BRANDS', and 'CATEGORIES'.
